

Aurchain Biotech

Research Peptide & Cosmetic Peptide Catalog 2026

B2B peptide raw material sourcing, documentation support and custom peptide project communication for global buyers.

Focus Areas	Research peptide materials, cosmetic peptide ingredients, peptide synthesis materials
Documentation	COA, HPLC, specification sheet and batch documentation support by request
Service Model	B2B sourcing communication, flexible order discussion and global export coordination
Contact	research@aurchainbio.com WhatsApp +44 7724 786175 www.aurchainbio.com

About Aurchain Biotech

Aurchain Biotech provides peptide sourcing solutions for global B2B customers, including research laboratories, distributors, cosmetic ingredient companies and formulation teams.

We focus on clear product communication, documentation support, quality verification and responsive sourcing assistance. Product availability, packaging format, documentation scope and quotation details can be discussed according to project requirements.

- ? Cosmetic peptide supply
- ? Research material supply
- ? Custom peptide project communication
- ? COA / HPLC / specification documentation support
- ? Global B2B service and export coordination

Research Peptide Categories

Representative product names are provided for sourcing review. Availability, documentation and quotation depend on product category, batch and testing requirements.

Product Name	Category	Documentation
BPC-157	Research peptide material	Documentation available by request
TB-500	Research peptide material	COA / HPLC support discussion
CJC-1295	Research peptide material	Batch information available by request
Ipamorelin	Research peptide material	Specification discussion available
MOTS-c	Research peptide material	Sourcing review available
GHK-Cu	Research and cosmetic peptide material	COA / HPLC support discussion
KPV	Research peptide material	Documentation available by request
GHRP-2	Research peptide material	Specification discussion available
GHRP-6	Research peptide material	Specification discussion available
Hexarelin	Research peptide material	Batch information available by request
Sermorelin	Research peptide material	Documentation available by request
Epithalon	Research peptide material	Sourcing review available

Cosmetic Peptide Ingredients

Representative cosmetic peptide ingredient names for professional formulation and B2B sourcing communication.

Product Name	Category
GHK-Cu	Cosmetic peptide ingredient
Copper Tripeptide-1	Cosmetic peptide ingredient
Tripeptide-1	Cosmetic peptide ingredient
Acetyl Hexapeptide-8	Cosmetic peptide ingredient
Palmitoyl Pentapeptide-4	Cosmetic peptide ingredient
Acetyl Tetrapeptide-5	Cosmetic peptide ingredient
Biotinoyl Tripeptide-1	Cosmetic peptide ingredient
Nonapeptide-1	Cosmetic peptide ingredient
Palmitoyl Tripeptide-1	Cosmetic peptide ingredient

Peptide Synthesis Materials

- ? Fmoc amino acids
- ? Protected amino acids
- ? Peptide resins
- ? Custom peptide intermediates

Quality Documentation Support

COA Support

Batch-level COA documents may be available depending on product, batch and customer requirements.

HPLC Support

HPLC reference documentation can support purity review and sourcing discussion.

Specification Sheet

Specification information can be discussed by product category and project requirement.

Batch Documentation

Available documentation scope may vary by product, batch and testing requirement.

Flexible Packaging & B2B Service

- ? Sample quantity discussion
- ? Wholesale quantity support
- ? Custom packaging discussion
- ? Export documentation assistance
- ? Responsive WhatsApp and email communication
